## EXPERIENCE

### **Keyera Corp., Alberta — HDD Supervisor**

August 2022 - March 2023

Oversee execution of multiple 400-1800m HDD bores installing individual NPS 12 and NPS 16 lines.

Monitor reporting, track progress and performance of Drilling Contractors and Services.

Monitor usage of water and drilling fluid products, track disposal.

### **CNOOC International, Alberta — Drilling Superintendent**

2017-2022

Work as Calgary office Drilling Superintendent overseeing complex multi-rig SAGD horizontal drilling campaigns.

Work with engineering and SCm to optimize project performance to control costs and efficiency/safety of drilling operations.

Assisted the E&C department with gaining control of 12 bore HDD project that had experienced cost and schedule overruns.

Maintained a safety minded culture with a team of up to 6 drilling supervisors.

### **Nexen CNOOC, Alberta — Senior Drilling Supervisor**

2004-2017

Supervise drilling operations on various wells in thermal fields ranging from multi-rig vertical core projects to slant spud SAGD pads.

Optimize drilling operations and well design, BHA design and operational practices to achieve extremely efficient and safe operations.

Supervise cement jobs on various wells following strict protocol for regulatory and internal company compliance.

Organize and order services and vendors, track hours, monitor quality of service provided and plan services to minimize any downtime on drilling rigs.

## CAREER HIGHLIGHTS

Experienced drilling professional with over 45 years of drilling experience.

Management level Drilling Consultant having worked on in depth planning of complex drilling campaigns.

Extensive field experience on an extremely wide range of drilling operations allows for detailed observation, troubleshooting and optimization skills.

High level of practical knowledge on rig design and manufacturing providing the ability to identify latent hazards that exist with equipment and processes.

High capacity supervision skills having planned, coordinated and supervised many multi-rig drilling campaigns.

Knowledgeable about drilling fluids, hole conditions and formations especially in the WCBS.

### **RCS Energy, Alberta — *Drilling Coordinator***

2002-2004

Supervise drilling operations utilizing Precision Drilling, Sedco Drilling, Nabors Drilling on conventional, walking rigs and Ensign ADR pad rig.

Coordinate multi-rig drilling operations and all services for: Alberta Oilsands Core Project, Grizzly Oilsands Core Project, Patch Energy Core Project, Deer Creek Core Project.

Directly supervise drilling operations for Deer Creek commercial SAGD project (Shallow TVD SAGD).

Directly supervise drilling operations for Trident Explorations Coalbed Methane multi-leg wells.

### **Nexen Energy, Alberta — *Drilling Supervisor/Rig manufacturing Supervisor***

2001-2002

Supervise manufacturing of 3 super single pad rigs designed specifically for slant spud SAGD wells.

Supervise drilling operations for multi-rig slant spud SAGD project.

Supervise drilling operations for observation wells running piezometers and sensors to monitor steam chambers in thermal field.

### **Driller Technology, Mexico — *Rig Manager***

1999-2001

Rig Manager drilling multi well pads utilizing walking conventional double pad rig. Wells were high pressure high temperature H2S wells.

### **Precision Drilling, Various — *Rig Manager***

1994-1999

Rig Manager on hydraulic pad rig. hydraulic slant drilling rigs, conventional singles, double and triples.

Yard supervisor while building Slant single pad rig for first SAGD projects in Canada.

Worked as top drive technician throughout the 100 rig fleet.

### **Geosearch Drilling, Various — *Rig Manager***

1993-1994

Rig Manager on conventional singles, double and triples.

### **Dolphin Drilling, Various — *Rig Manager/Driller***

1983-1993

Rig Manager on conventional singles, doubles. Drilled on conventional singles and doubles.

## **Rig Service, Various — *Tong Hand***

1981-1983

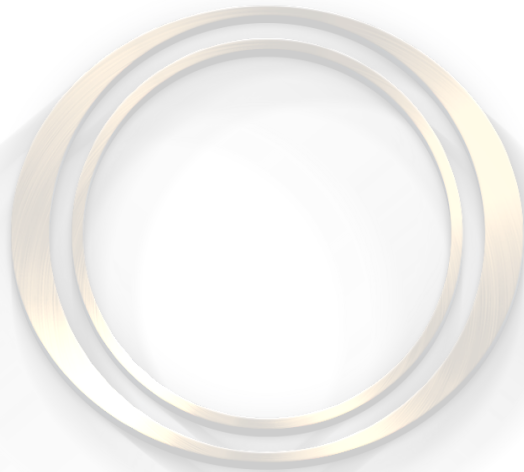

Tong hand running casing and hydro jack. Running casing and pulling stuck strings on rigs throughout Canada.

Ran tongs and hydro jack pulling 60 inch velocity barrel in the Mackenzie Delta.

## **D&D Drilling, Various — *Driller***

1978-1981

Worked from roughneck to driller on conventional singles and doubles.
